

Dear Sir

I wish some information on a mission on Mar 4-94 over Berlin Germany. So far I haven't read anything about it. I was on Lt Henry Hanson Crew. We were sent to Berlin the morning of Mar 4-94. Some where we lost contact with the balance of our outfit. We bombed Berlin and got back home safe. When we landed we were told the 306 was recalled and there was only 7 planes west over Berlin, I would like to know the facts of this mission. Also how I could get my record on the mission I was on. On my 13 mission we had to ditch in the North Sea. I would appreciate you letting me know if this is possible.
